Peer Game Review

Rishabh: TicTacToe

Rishabh has implemented a UI based tic tac toe where his UI is mouse click based.(extra points there)

The game is based on python my personal favorite part and is single player game where the player plays against an AI.

Following are the comments:-

- The UI is simple and fantastic and works like a charm.
- The technique is AI based and if he has coded the AI in 3 hours, super extra points for that.
- I played the game 3 times and lost once and draw twice. (The AI is good)
- The code did not break in all the three test instances.
